

Holm Filters

Holm provides manufacturer spec filters for plant and construction, plus agricultural equipment, machinery and vehicles. A large range of credible, original spec filters including both a complete range of high quality Holm and original manufacturer brand filters.

Holm filters can be purchased individually or to maximise efficiency and productivity choose our service filter kits, containing everything you need to complete an interim or full service on your construction and agricultural equipment. You can even configure your own kit for your vehicle(s).

Holm is Where the Part is

At Holm we are revolutionising the way you can source and buy all the filters you need for your fleet:

Holm on the range. Holm offer the most comprehensive range of filters available: including Holm and Manufacturer branded filters of every type you will need for the plant and construction, plus agricultural industries.

Holm filter quality is assured, including when you select from the Holm range, which are manufactured to a similar quality, if not higher in some circumstances, as manufacturer branded and competitive filters.

Holm filter finder is a unique, online method of finding and selecting any replacement filter for any make or model of plant and agricultural machinery. Using the dropdown options on our website you can find a filter by manufacturer, model and variant or by filter type, width, height or thread.

Holm filter part numbers are easy to understand and utilise as all Holm filters are identified by a unique six digit reference system, combining the type, detail and manufacturer, to make ordering and re-ordering simple and easy.

Holm filter availability is supported by a comprehensive stock of thousands of filters available direct from our warehouse, so we are confident that we will have the replacement filter you need when you need it.

Holm filter identification is easy in your stores as we can even label to your own reference numbers if required.

Holm filter guarantee goes further than many manufacturers, as we cover both replacement parts and labour, paying for all associated costs of restoring the vehicle back to the condition it was in before the issue.

Holm filter kits help to reduce downtime and costs with simplified filter service kits containing everything you need for a filter change during regular interval servicing. We can even configure kits to your very own requirements.
